

One-Click Deployment of Data Processing Systems

ABSTRACT

A method and computer network to deploy a group of data processing systems.

- 5 One embodiment of the invention involves a method to deploy one or more data processing systems. A second embodiment of the invention involves a computer network to facilitate the intelligent deployment of one or more data processing systems. A third embodiment of the invention involves a computer program embodied on electronically-readable media, containing instructions to deploy one or more data
- 10 processing systems.
